SUMMARY

Frontend professional with over three years of experience in full-stack development and team leadership, expert in agile methodologies and advanced frontend technologies. Key achievements include a 50% reduction in bug reports through continuous integration practices and enhancing application load speeds by 40% via advanced caching and code-splitting techniques. Seeking a Frontend Software Engineer position.

RELATED EXPERIENCE

Senior Frontend Developer
WellFed

📅 04/2024 - Present 📍 Remote

- Achieved 50% reduction in bug reports by implementing continuous integration practices.
- Enhanced application load speeds by 40% through implementing advanced caching and code-splitting techniques.
- Led a team of 10 developers on a complex full-stack project with over 100,000 lines of code.
- Elevated team performance by 25% by implementing new agile methodologies.

Full Stack Developer
Frontend Simplified

📅 06/2024 - 10/2024 📍 Remote

- Transformed a static HTML, CSS, JavaScript and React single page application into an interactive user interface using animations, transitions and carousels
- Processed API requests with Axios to dynamically represent data from a cloud server and represented it through skeleton loading states, pagination and dynamic routing
- Collaborated with a team of developers, contributing to a 20% increase in team productivity

Full Stack Developer
Bellevue Group Inc

📅 01/2024 - Present 📍 Remote

- Delivered 10+ professional websites using HTML5, CSS3 (+ SCSS, BEM), JavaScript and React best practises
- Improved website performance by compressing, caching and lazy loading images and components
- Increased user engagement by 20% by implementing state-of-the-art frontend technologies
- Optimized codebase, reducing page load times by 35%, resulting in a $50K cost saving on server expenses annually

Full Stack Developer Intern
Twitter

📅 06/2021 - 08/2022 📍 Remote

- Actively participated in code reviews, providing constructive feedback and ensuring codebase integrity and quality
- Contributed to the debugging and resolution of critical bugs, showcasing my problem-solving skills and attention to detail
- Engaged in daily stand-up meetings, presenting progress updates and discussing project roadblocks, fostering effective communication within the team
- Worked on a project with over 150,000 lines of code, restful APIs
- Collaborated with a team of 10+ developers to manage a $500K project

SKILLS

APIs, Redux, Agile, React Native, HTML5, CSS3, SASS, SQL, React, JavaScript ES6+, TypeScript, OOP, Next.js, Git, GitHub, Firebase, Angular, Vue.js, Vuex, Jest, Vite.js, OpenAI API, Material UI, Netlify, Python, Java, Figma, Lighthouse, Webpack, AWS, Payload, Docker, Convex, Cypress, Hooks

MY RECENT PROJECTS

Full Stack CRUD application

Created a fully responsive SAAS application using Nextjs, OpenAI API, TailwindCSS, TS, and full Authorization using Clerk and Convex.

GitHub | Live-App

Twitter Clone

Developed a social media app clone with functionality for posting tweets, sign-in/sign-out authorization and more. Using Next.Js, TailwindCSS, Typescript, Firebase and Redux.

GitHub | Live-App

Local Business Website Remodel

This was a local business client that needed a full remodel of their website. I used Next.js 14, TailwindCSS, Material UI, Typescript and best practice programming.
